Professional Summary

A dedicated, pragmatic and buoyant Software Engineer with experience working collaboratively in an agile environment building high quality scalable back-end systems for a fast-paced, high traffic business. Brings a strong learning mindset, proven on-call responsibility and a focus on improving system observability and performance.

Technical Skills

Languages: Java, JavaScript, Kotlin, Scala, R

Frameworks/Tools: Spring Boot, Node.js, Maven, Gradle, Jenkins, Docker, Postman, Go Pipelines, Splunk, Kibana, Grafana

Cloud/Infrastructure: AWS, Kubernetes, Kafka, REST APIs, GraphQL, RabbitMQ, Linux VMware, MySQL, Cassandra, MongoDB, Github Actions

Other: Git, Github, Gitlab, Bitbucket, Agile Methodologies

Experience

Associate Software Engineer | Flutter UKI | September 2024 – Present

- Built backend systems from scratch for Paddy Power, Betfair and Sky Betting and Gaming using **Java** and **Maven**, such as Acca Freeze
- Delivered critical, high risk improved Self-Exclusion logic across brands during **platform migration**
- Maintained **legacy systems** during a multi-brand merger
- Integrated **monitoring** tools to support scalable delivery across production

Technology Graduate | Sky Betting and Gaming | September 2022 – 2024

- Implemented **backend** features like Recommended Bets and Football Metadata using **Kotlin** and **Javascript**, with **Gradle**
- Developed **CI/CD** pipelines using **Jenkins** and **Artifactory**
- Joined **on-call** rota after 12 months, resolving **live** issues under pressure
- Worked with **VM patching**, **monitoring** and external API integrations
- Led **retrospectives** and helped refine **Agile** workflows in a fast-paced team
- Performed **active monitoring** duties during extreme traffic such as Cheltenham

Early Career Roles | Tesco, MyTutor, Hermes, ReviveIT, NHS | 2015 – 2022

- Built foundational **communication**, **organisation** and **auditing** skills across customer focused and administrative roles
- Refined **time management**, **critical thinking** and **teamwork capabilities**
- Supported NHS medical data operations, focusing on **secure data practices**

Education

MSc Digital Technology and Solutions Specialist Degree Apprenticeship Sheffield Hallam University | Distinction | 2022 - 2024

- Covered **full stack** development, **DevOps**, **Agile** and software engineering practices
- Balanced workload with demands of job role at Sky Betting and Gaming
- Dissertation focused on **observability** improvements to **backend monitoring** and metrics for quicker diagnosis and resolution of incidents

MSc Animal Behaviour and Evolution University of Sheffield | Merit | 2020 - 2021

- Practiced field research techniques to gather and treat samples
- Conducted data-driven project analysing otter dietary habits utilising **gel electrophoresis**
- Performed statistical analysis of findings using **R**

BSc Biological Sciences University of Birmingham | 2:1 | 2017 - 2020

- Developed understanding of biological principles such as DNA, evolution, ecology and protein synthesis
- Final year project involved conservation data mapping with GIS, specifically looking at populations of fig tree species in Indonesia

Additional Information

Mentoring

- Mentored **junior engineers** through the graduate scheme at Sky Betting and Gaming
- Participated as a mentor in the **Flutter x Goodwork** programme to help disadvantaged graduates into a role in industry

AWS Certifications

- Outside of work, currently pursuing **AWS** certifications in Cloud Practitioner, Cloud Developer and Solutions Architect fields.
- Exams yet to be completed but will be available on request when achieved

Professional Development

- Attended WebSummit 2023 to investigate emerging technologies
- Currently building a **REST API** to extract exact timings of events during a football match for use as an internal tool
- Keen interest in **game development** as a hobby, helping increase my **C#** proficiency
